-  Keeps out large leaves
-  Keeps out pests & vermin
-  Bushfire compliant
-  Ember guard compliant (BAL 12.5, 19, 29)
-  Medium strength
-  27 Colours

Specification Guide

PRODUCT DESCRIPTION

Fine, flexible and ember guard compliant, Blue Mountain Co 2mm Aluminium Gutter Mesh keeps out small-sized leaves, pests and vermin out of your gutters and roofs. It suits popular roof types (corrugated, Trimdek® and tile), and is ember guard (BAL 12.5, 19, 29) and bushfire (AS3959-2009¹) compliant. 2mm Aluminium Gutter Mesh is available in 27 colours.

HOW IT WORKS

Blue Mountain Co Gutter Mesh is an over-the-gutter, ski-slope design which forms a physical barrier to prevent leaves and debris from entering gutters. The mesh fits from the outside edge of the gutter across the gutter section and then is attached to the roof surface. This creates a platform that suspends leaves and debris above the roof gutter, allowing the majority of material build-up to be blown away by wind action.

FEATURES AND BENEFITS

- Blue Mountain Co 2mm Aluminium Gutter Mesh is compliant for use as an ember guard in Bushfire Attack Levels (BAL) 12.5, 19, 29.
- Conforms to the Australian Standard for the Construction of buildings in bushfire prone areas (AS3959-2009¹).
- Meets the Australian Standard for ember guard protection of sheet roofs (AS3959-2009¹/Amdt 2011).
- The 2mm aperture is ideal for small leaf trees (e.g. wattle, jacaranda, Poinciana).
- Mesh and componentry is available in 27 colours.
- Suitable for corrugated, tile and Trimdek® roof types.
- The gutter mesh comes in a kit complete with colour-matched trims, screws and fixings to suit the required roof type.

For superior bushfire and ember guard protection, our 2mm steel mesh is ember guard compliant to all BALs (12.5, 19, 29, 40 and FZ) and offers the superior strength of steel.

MAINTENANCE

No gutter guard system is completely maintenance free. From time to time, you will need to check your gutter guard for any debris caught on the edge of the mesh or saddles, including the valley mesh. If there is any build-up of sediment or fine debris inside the gutter, use a normal pressure hose to flush the debris through the mesh out of the gutters and down the downpipe. You should not remove the mesh whilst carrying out maintenance.

¹ Compliant for use on new homes in bushfire-prone areas with a bushfire attack level (BAL) of 12.5 or higher, as per AS3959-2009 Australian Standard: Construction of buildings in bushfire-prone areas.

MESH ROLLS

Blue Mountain Mesh 2mm Aluminium gutter guard can be purchased in 10m, 15m and 30m rolls.*
*750mm wide Tile Valley mesh is only available in 10m and 30m rolls.
